

### List of tables

Table	Worksheet name	Contents
No. 1	age brackets	Division of the population of the Czech Republic by age brackets, both sexes, as at 31.12. 1993 - 2003 real status, 2004 - 2050 median variant population projection
No. 2	life expectancy	Life expectancy - at birth, at the age of 60 and 65 years, by sex 1993 - 2003 actual status, 2010, 2030 and 2050 median variant population projection
No. 3	dependency indices	Demographic old age dependency index - dependency indices in %, both sexes, as at 31.12. 1993 - 2003 actual status, 2010, 2030 and 2050 median variant population projection
No. 4	types of living	Share of persons over 65 by selected types of living Right of enjoyment of persons over 65 Percentage of persons over 65 living with their children Percentage of persons over 65 living with another adult person Percentage of persons over 65 living alone
No. 5	GDP per capita	GDP per capita in %
No. 6	empl. and unempl. rate	Employment rate and unemployment rate in %
No. 7	empl. and unempl. pop.	Population by age brackets - employed, unemployed, inactive
No. 8	soc. protect. expenditure	Social protection expenditure as % of GDP
No. 9	pension exp. GDP	Pension expenditure as % of GDP
No. 10	public finance	Public finance situation - indebtedness and deficits in % GDP
No. 11	persons - residential fac.	Population by age and type of living - persons over 65 living in residential care facilities
No. 12	poverty risk	Exposure to poverty risk of persons over 60, 65 and 75 and younger Occurrence and distribution of poverty risk by age brackets and right of enjoyment Exposure to poverty risk of persons over 60, 65 and 75 by various income thresholds Relative poverty risk Relative income Structure of income by source Comparison of median pension income of pensioners Unequality of distribution of income (S80/S20) of older persons Unequality of relative income
No. 13	simulation - income	Simulation of income situation based on ISG methodology
No. 14	econom. active	Total employment rate: percentage of economically active Economic old age dependency rate: inactive population Employment rate of older workers Effective age limit for exit from the labour market
No. 15	expenditure forecasts	Forecasts of public pension expenditure
No. 16	change factors - exp.	Breakdown of rise in expenditure by main factors - demography, employment, entitlement, level of benefits
No. 17	number of pensioners	Development of number of pensioners by type of pension
No. 18	average amount	Development of average amounts by type of pension
No. 19	income and expenditure	Development of income and expenditure of the pension insurance system
No. 20	wages	Share of employees in % according to average wage brackets for the years 1996 - 2003, chart

## Division of the population of the Czech Republic by age brackets

year	total	0 - 14	15 - 24	25 - 44	45 - 59	60 - 64	65 - 74	75+
1993	10 334 013	2 009 752	1 679 006	2 902 957	1 884 115	515 259	881 607	461 317

Note: dependency indexes, both sexes, as at 31.12.

1993 - 2003 - actual status

2010, 2030, 2050 - medium option of the population projection

## Share of persons over 65 by selected types of living

	Total	Men	Women
<b>Persons 65+</b>	1 410 571	543 114	867 457
<i>thereof share in %:</i>			
<b>living alone in a flat</b>	30	16	39
<b>living with a partner 65+ years</b>	38	50	31
<b>living with children</b>	23	21	23

Source: The Czech Statistical Office

Note: living with children - these are all persons living with their children, i.e. regardless of the age of the children  
part of the persons are included twice - if spouses over 65 live with their child  
they are included both in persons living with a partner and living with children

## GDP per capita

	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004
<b>in CZK (current prices)</b>	141 972	160 988	173 252	190 626	198 521	209 302	226 449	236 714	250 033	269 530
<b>in PPS</b>	10 664	11 510	11 742	11 839	12 172	12 811	13 531	14 319	14 690	
<b>year-on-year increase in CZK</b>		19 016	12 264	17 374	7 895	10 781	17 147	10 265	13 319	

**Source:** The Czech Statistical Office

**Note:** GDP per capita in CZK = proportion of GDP in current prices to mid-year population in the relevant year

GDP per capita in PPS = proportion of GDP per capita in CZK to purchasing power parity expressed in CZK in PPS.

PPS (Purchasing Power Standard) is the common reference currency which equalizes the purchasing power of different national currencies

of EU Member States according to the status after EU enlargement on 1 May 2004 to EU25. The aggregate data on GDP on behalf of all 25 countries converted to EUR equal the sum expressed in PPS

For the year 2004 Eurostat will perform the first estimate (nowcast) in May 2005 based on information on the development of GDP and prices in EU25.

## Employment rate and unemployment rate

	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004
<b>employment rate</b>	59,0	58,9	58,2	57,1	55,7	55,1	55,1	55,4	54,8	54,3
<b>unemployment rate</b>	4,0	3,9	4,8	6,5	8,7	8,8	8,1	7,3	7,8	8,3

**Source:** The Czech Statistical Office- Labour force sample survey (LFSS)

**Note:** data - persons aged 15 years and older, average amounts

employment rate - expresses the proportion of the number of the employed persons to the number of all 15-year old persons and older

unemployment rate - expresses the proportion of the number of the unemployed to the total labour force (in percentage) where numerator and denominator are indicators structured according to international definitions and recommendations applied in the course of LFSS

The indicator is structured according to Eurostat methodology developed based on recommendations of the International Labour Organization (ILO).

Population by age brackets - employed, unemployed, inactive

## Population by age and type of living - persons over 65 living in residential care homes

	Age structure of the population living in residential facilities								
	total	in flats	in residential facilities						other than fl. & res.fac.
			total	educational	health service	for pensioners	church	other	
<b>0 - 64</b>	86,2	86,4	54,0	99,8	84,9	15,7	38,4	89,3	93,8
<b>65 - 69</b>	4,2	4,3	4,5	0,1	3,1	7,4	4,3	1,3	1,9
<b>70+</b>	9,6	9,3	41,5	0,1	12,0	76,9	57,3	9,4	4,3

In old people's homes and in pensioners' lodging houses a total of 32.7 ths. persons have been counted, most of them have reached the pension age (persons aged 60 and older represent almost 90% of persons living in pensioners' residential care facilities). In these establishments mostly older pensioners live, three quarters of of all persons in establishments for pensioners are aged 75 years and older.

In monasteries as residential facilities 1.5 ths. persons have been counted, these are also mostly older people, more than one half is represented by people over 70.

Source: The Czech Statistical Office

A total of 45,150 persons over 65 live in residential care facilities.

Source: The Czech Statistical Office - section of household surveys, department of social surveys

Note: Results were obtained by means of a sample survey Microcensus 2002 and the above data were processed on behalf of 7,973 households managing their financial affairs from the whole of the Czech Republic. Income of persons and households were collected for the year 2002, demographic data according to the status at the end of the relevant year. Data on economic activity, type of job and industry that are directly linked to data on income were fixed according to the prevailing status, in the case of equality according to the status at the end of 2002. Data were converted to the entire population in the Czech Republic.

Poverty line - has been determined according to the EU methodology that uses as the relative poverty threshold 60 % of the median equivalized income of the total figure for households.

Equivalized income - income per consumer unit that has been structured as proportion of net cash income of a household and the number of its consumer units.

Consumer unit - a quantity that reflects demographic structure and size of households. Number of consumer units per each household was calculated by way of reweighting members of a household using the weights according to the EU methodology as follows:  
weight 1.0 was allocated to the first adult household member  
weight 0.3 was allocated to a child under 13  
weight 0.5 was allocated to all other household members

## Simulation of income situation

	100% average income (second column: 10 years after retirement in proportion to projected average income)					2/3 of average income		100% average income on the average in the course of the working life with rising (concave) income profile (2)		Rising income from 80% to 120% average		Rising income from 100% to 200% average		Interrupted career: only 30 years of insurance period upon retirement (3)

Source: MLSA

**Note: The share of pension expenditure equals to the product of 4 factors defined as follows:**

Demographic factor – proportion of number of persons in the age bracket over 55 years to the number of persons in the age bracket 15 – 64 years (in %)

Employment factor – proportion of the number of employed persons to the age bracket 15 -64 years (in %)

Entitlement factor – proportion of the number of old-age pensioners to the number of persons in the age bracket over 55 years (in %)

Level of benefits factor – proportion of the annual amount of the average old-age pension to GDP per employed person

Number of pensioners in the period XII. 1996 - XII. 2004
